GAME-THEORETIC ANALYSIS IN ECONOMICS

Igor V. Evstigneev, University of Manchester

Publications

Oligopoly with network effects: firm-specific versus single network, 2021, Economic Theory, 71, 1203-1230 (with R. Amir and A. Gama.). DOI

A new look at the classical Bertrand duopoly, 2018, Games and Economic Behavior, 109, 99-103 (with R. Amir). DOI

Correlated equilibrium in a nutshell, 2017, Theory and Decision, 83, 457-468 (with R. Amir and S. Belkov). View-only pdf file

A new perspective on the classical Cournot duopoly, 2017, Journal of Dynamics and Games, 4, 361-367 (with R. Amir). DOI

On Zermelo's theorem, 2017, Journal of Dynamics and Games, 4, 191-194 (with R. Amir). DOI

Noncooperative versus cooperative R&D with endogenous spillover rates, 2003, Games and Economic Behavior, v. 42, 183-207 (with R. Amir and J. Wooders). DOI

Noncooperative games in networks: Stability and sensitivity of equilibria, 1997, in: Complementarity and Variational Problems: State of the Art, M.C. Ferris and J.-S. Pang, eds., SIAM, Philadelphia, 62-75 (with S.D. Flåm). View-only pdf file
